Professional Summary

Results-driven Full Stack MERN Developer with hands-on experience building scalable web applications, REST APIs, AI-powered systems, and cloud-native deployments. Skilled in React.js, Node.js, MongoDB, AWS, Docker, CI/CD pipelines, authentication systems, and AI integrations using LangChain and Gemini API.

Skills Summary

- **Languages**: JavaScript (ES6+), Java, SQL, TypeScript (Basic)
- **Frontend**: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Redux
- **Backend**: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io
- **Database**: MongoDB, Mongoose, MySQL, Redis (Basic)
- **Cloud & DevOps**: AWS EC2, AWS S3, IAM, Docker, Docker Compose, GitHub Actions, Nginx, Linux CLI
- **AI / ML**: LangChain, Google Gemini API, OpenAI API, RAG Architecture, Vector Embeddings
- **Tools / Concepts**: Git, GitHub, Postman, VS Code, CI/CD, MVC Architecture, Load Balancing, Caching
- **Soft Skills**: Leadership, Communication, Problem Solving, Team Collaboration, Adaptability

Education

- **Tula's Institute** — Dehradun, India
  Bachelor of Technology - Computer Science and Engineering — *2022 – 2026*
  - Relevant Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering
  - Final Year Project: AI-powered document assistant using RAG and LangChain deployed on AWS

Experience

- **Kartsho Solutions Pvt.Ltd.** — Remote
  Software Engineer — *Feb 2026 – Present*
  - **Cloud Deployment**: Containerized MERN applications using Docker and Docker Compose and deployed applications on AWS EC2 with Nginx reverse proxy and SSL setup.
  - **CI/CD Automation**: Built automated CI/CD pipelines using GitHub Actions reducing deployment time and improving development workflow efficiency.
  - **Authentication**: Implemented JWT-based authentication with role-based access control and refresh token management for secure applications.
  - **REST APIs**: Designed scalable REST APIs with optimized backend architecture and efficient database queries.
  - **Team Collaboration**: Worked in Agile-based development workflows with Git branching strategies and collaborative code reviews.

Projects

- **Uber Clone - Full Ride Booking System**: Developed a real-time ride booking platform with live GPS tracking, Razorpay payment integration, and Socket.io communication.
  Implemented Docker deployment on AWS EC2 with optimized MongoDB indexing and scalable backend architecture.
  Tech: React.js, Node.js, MongoDB, Socket.io, Razorpay, Docker, AWS EC2
- **SOP Agent - AI Powered Refund Policy Assistant**: Built a RAG-based AI assistant capable of PDF ingestion, semantic search, and intelligent query answering using vector embeddings and Gemini API.
  Integrated automated document indexing workflow using GitHub Actions.
  Tech: Node.js, LangChain, Google Gemini API, MongoDB Atlas
- **YojnaWatch - Government Fund Tracking Platform**: Designed a transparency dashboard for tracking government schemes, fund utilization, and analytics visualization.
  Implemented AWS S3 and CloudFront deployment with PM2 backend process management.
  Tech: React.js, Node.js, MongoDB, AWS S3, CloudFront, Chart.js

Achievements

- **Production-Level Applications**: Built and deployed multiple production-ready MERN stack applications with cloud-native deployment practices.
- **AI Integration Projects**: Developed AI-powered systems using LangChain, RAG pipelines, and Google Gemini API integrations.
- **Backend Engineering**: Strong understanding of scalable backend systems, authentication workflows, and DevOps deployment pipelines.

Certifications

- Certified in LaTeX – IIT Bombay Spoken Tutorial (2023)
- AWS Cloud Practitioner Essentials – In Progress
- Active Member – GREENEX Club, Tula's Institute
